What is a live bet? (US)

Overview

A live bet is a bet made after the event has started and is ongoing. Live betting is also known as 'In-Play' or 'In-Game' betting. The odds change continuously based on how the game is unfolding. For example, Team A may be the pre-match favorite, but if during the game Team B takes a big lead, the odds may shift towards Team B being the favorite.

Pre-Game Odds:

Live Odds:

Example of [Live-In-Game](#), in the case pictured below, the game has begun, indicated by the "LIVE" label and the odds have shifted.

Live Flash Props

Live Flash props allow bettors to take part in the action drive-by-drive or play-by-play.

Examples include but are not limited to:

- "Will the next drive result in an offensive score?"
- "Will the next play type be run or pass?"
- "Will the next drive cross the opponent's 35-yard line?"

Important: The default odds change behavior is an account settings preference that you can define. You can choose from: [Ask for Approval](#), [Accept Higher Odds](#), or [Accept Odds Changes](#). Setting this preference allows you to adjust the default behavior of the wager in your Bet Slip. To change this preference please visit your [Sportsbook account settings](#).

WHATS FAIR IS

FUN

Licensing. Auditing. Laws and regulations. Lots of legalities go into building a casino that's fair — and DraftKings is committed to bringing you the best one. Here's a better understanding of the steps we take to ensure game integrity.

Every jurisdiction has a regulator

Each jurisdiction has its own governmental agency, often referred to as a regulator, that reviews and approves an online casino before it launches. Many regulators often require independent lab certification as part of reviewing whether to grant permission for online casinos to operate. These independent lab certifications can be obtained by specific vendors certified by the regulator to conduct these types of reviews. While different jurisdictions may have different requirements as to types of online casino games offered, DraftKings Casino must receive full authorization from the regulators prior to making any casino games available to players.

We create game-changing experiences.

Gaming Laboratories International, LLC (GLI) is a fully independent and accredited testing laboratory and product certification body contracted by gaming industry operators and software and hardware suppliers to perform third-party testing, auditing and certification services. GLI verifies technical compliance with the standard(s) and/or jurisdictional regulation(s) adopted by the gaming authorities.

Random number generators test for fairness

Online casinos often use random number generators to determine the winning outcome of many casino games. DraftKings Casino's random number generators are all independently tested to ensure that the outcomes are randomly generated within established fairness specifications set by the independent testing laboratories, and provides verification to each regulator that the random number generator meets the regulatory specifications for fair play.

Operators follow set laws & regulations

Laws and regulations have been put in place to ensure online casino games function ethically and legally. If an online casino operator does not follow the rules set by a regulator, the regulator may impose disciplinary actions including fines or penalties on the online casino operator.

DraftKings Rocket and Rocket 2 - Overview (US)

What is DraftKings Rocket?

DraftKings Rocket is played with a rising rocket. You must exit the rocket before it stops rising. The higher it goes, the more the Player wins after successfully bailing out. The rocket's highest possible multiplier is 1000x. If the Player is in the rocket when it reaches 1000x, then the Player will automatically win 1000 times the bet amount. To learn more, please go to [How to Play Rocket](#).

What is DraftKings Rocket 2?

DraftKings Rocket 2 is a new variant of our original rocket game. Like the original game, you must exit the rocket before it stops rising.

What are the differences between Rocket and Rocket 2?

- Players can place two bets simultaneously, enabling more strategic decision-making.
 - Bets are customizable.
 - Players can set one or both of their wagers to manual or automatic.
 - Players can bail even with the auto bet on.
 - The first wager can be bigger or smaller than the second, or vice versa.
- More customizable rockets.

Note: Multipliers may vary by jurisdiction. The maximum amount players can bet may also vary by jurisdiction.

Important Information

Important Note: The Auto Cashout multiplier feature will determine when the Player exits the rocket. If no Auto Cashout multiplier has been manually set, then this will default to 1000x.

- If a Player gets geolocated during the middle of a round and is unable to manually bail, the Auto Cashout multiplier feature determines when a Player will exit the Rocket. Additional details and context can be found in the FAQ section below under are in the **Why did I get geolocated in the middle of my round?** section of the FAQs below.

Additional Notes:

- Max bet in all jurisdictions **except PA** is \$1,000 per bet.
- Max bet in PA is \$1,000 total across both bets.
- No autobet mode in Ontario or CT.

Important note: Players must ensure their bets are accurate and active before the round begins. Both bets need to be set by the Player.

Additional Questions about Rocket 2

How can we help?

Will Rocket 2 replace the original game?

Will Rocket 2 replace the original game?

Players can enjoy both versions of Rocket. No versions of Rocket will be removed unless technical difficulties occur.

Can I win a Jackpot playing Rocket 2?

Players may opt into Jackpots on Rocket games in some jurisdictions.

Please refer to the [Jackpot FAQ](#) for more information.

Where is Rocket 2 available?

Rocket 2 is currently available only in certain jurisdictions.

However, DraftKings is always looking to expand into additional states, jurisdictions, and territories.

Frequently asked questions

Why did I get geolocated in the middle of my round?

How can we help?

Players are automatically geolocated every so often to verify that they're located within a legal state. This helps ensure that players are playing in a legal and regulated environment.

Why did I get geolocated in the middle of my round?

Players are automatically geolocated every so often to verify that they're located within a legal state. This means that they can be geolocated at any time, even during a round.

If you disconnect or have connection problems or are unable to manually bail for another reason, then the player's Auto Cashout multiplier will determine when the player exits the rocket. If no Auto Cashout multiplier has been manually set, then this will default to 1000x.
